

We are working together to SAVE babirusa!

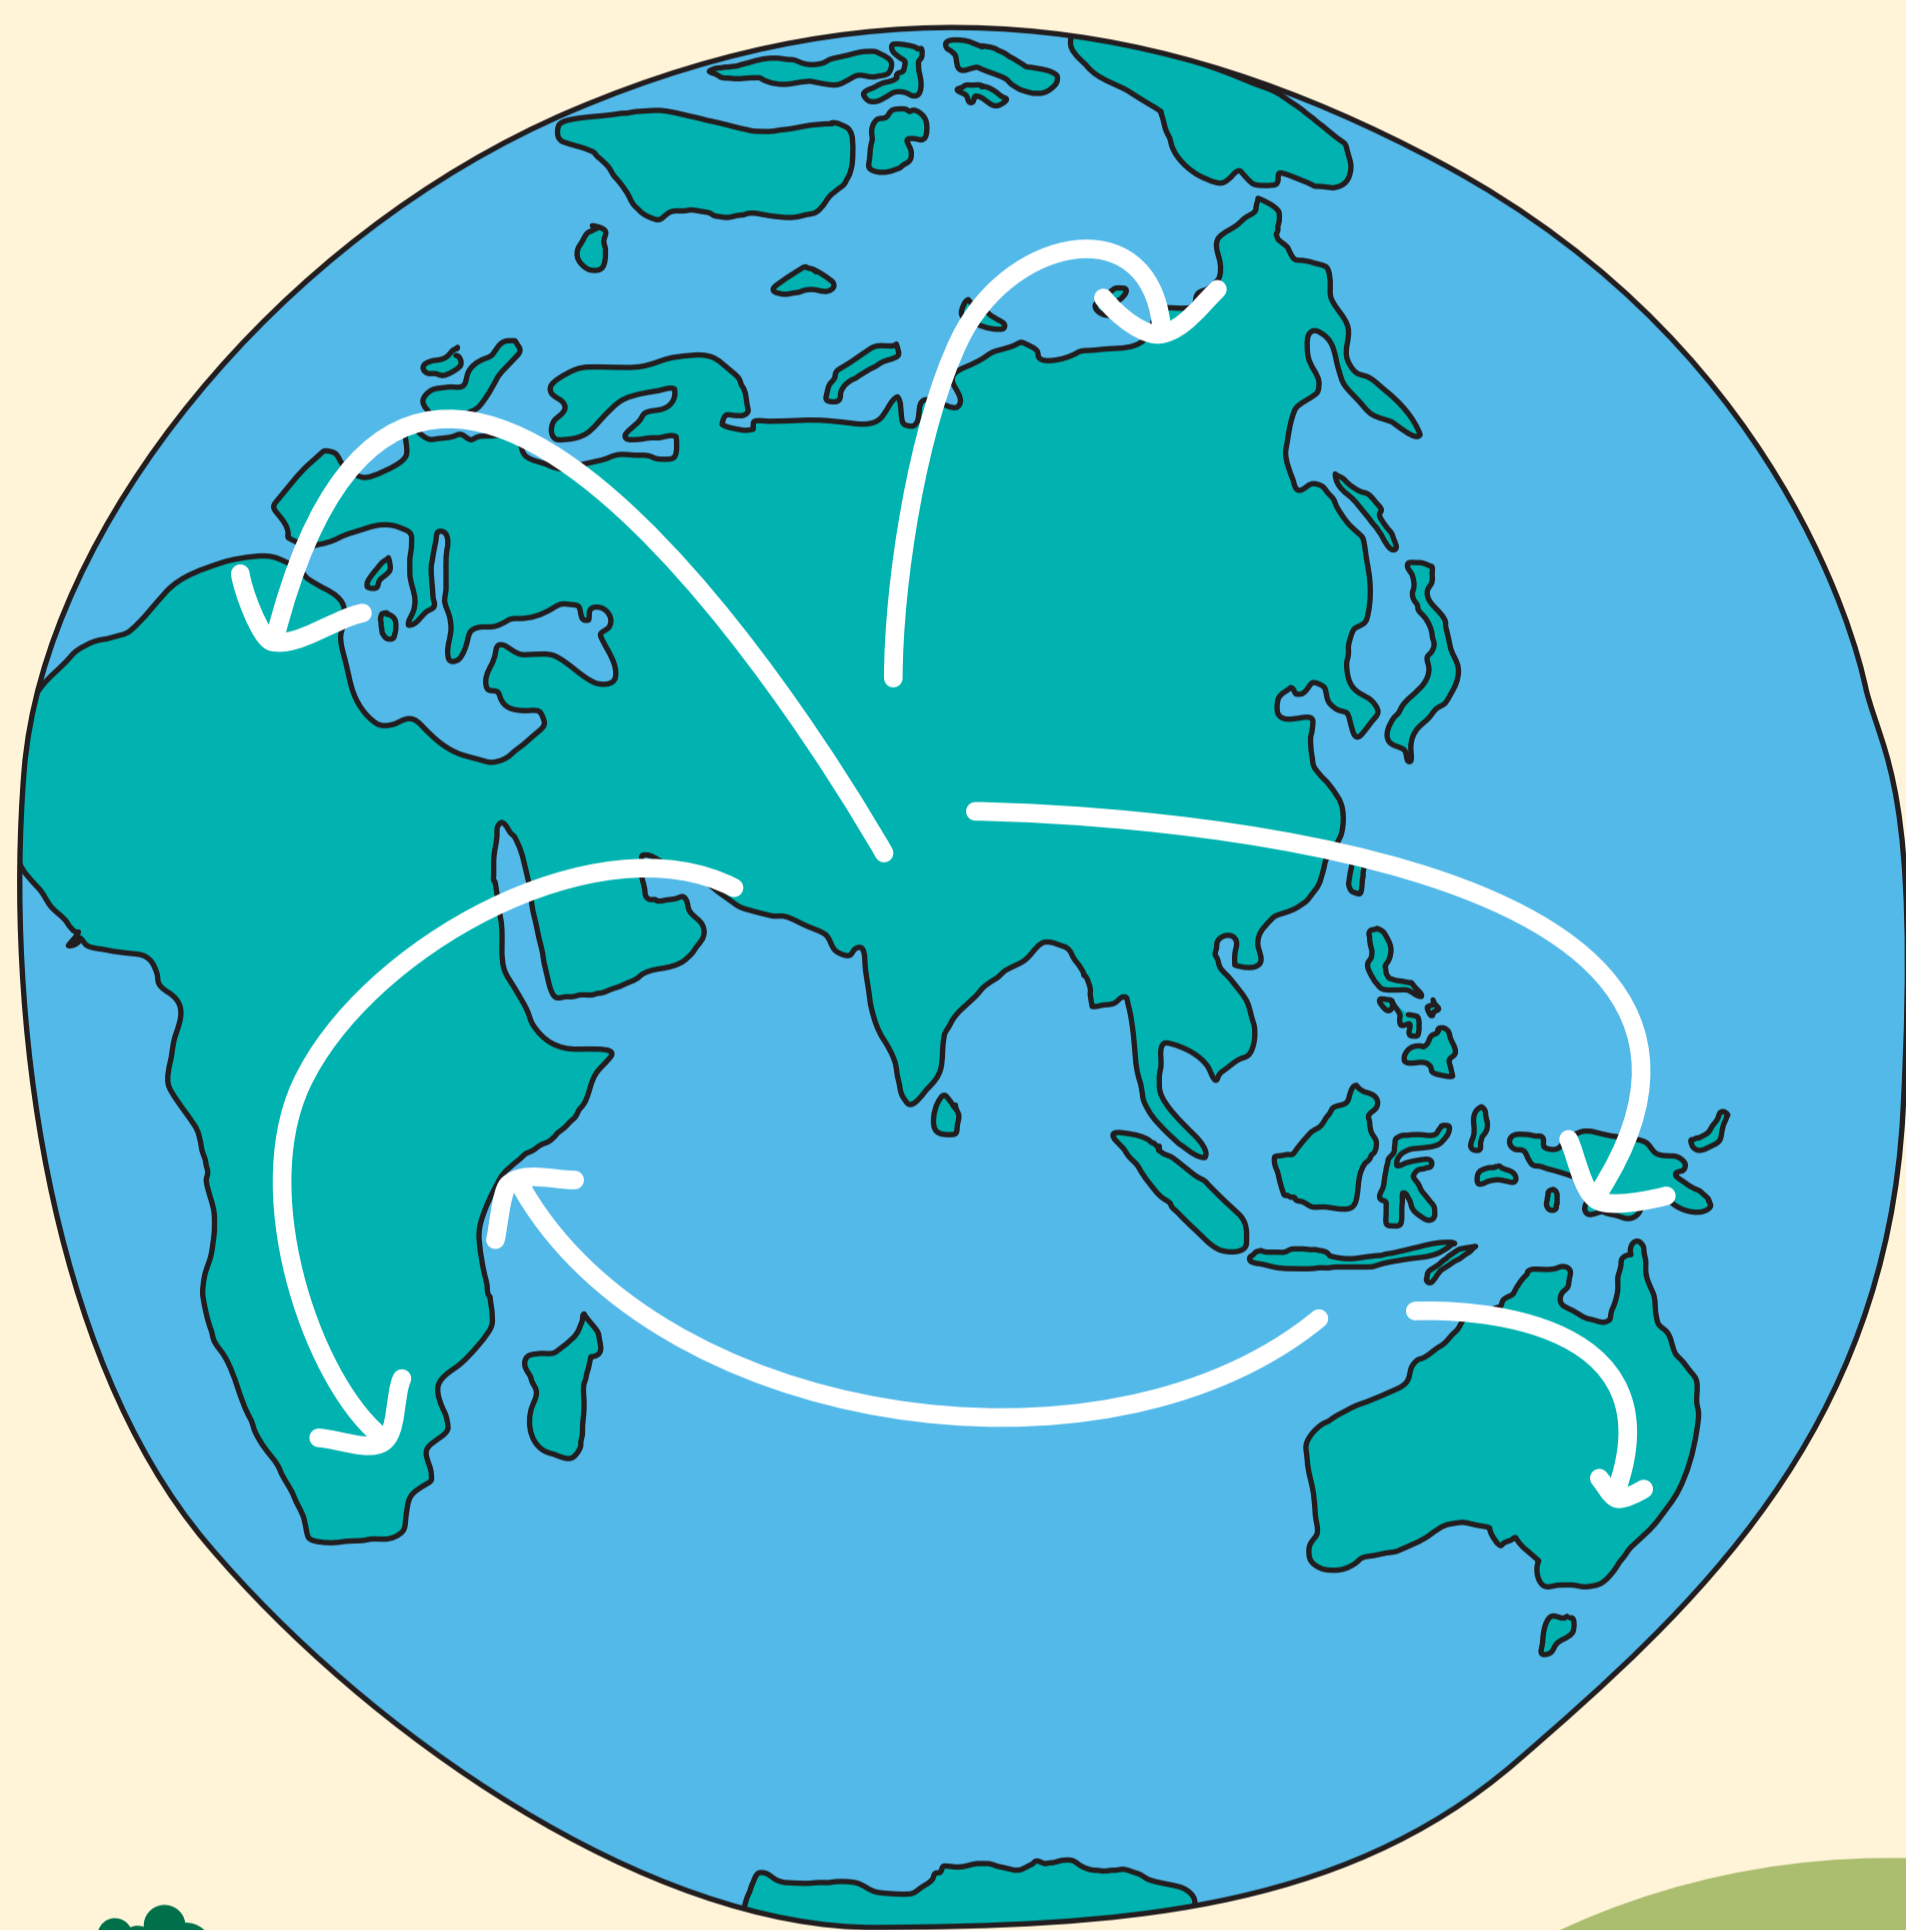

Babirusa are found in Indonesia

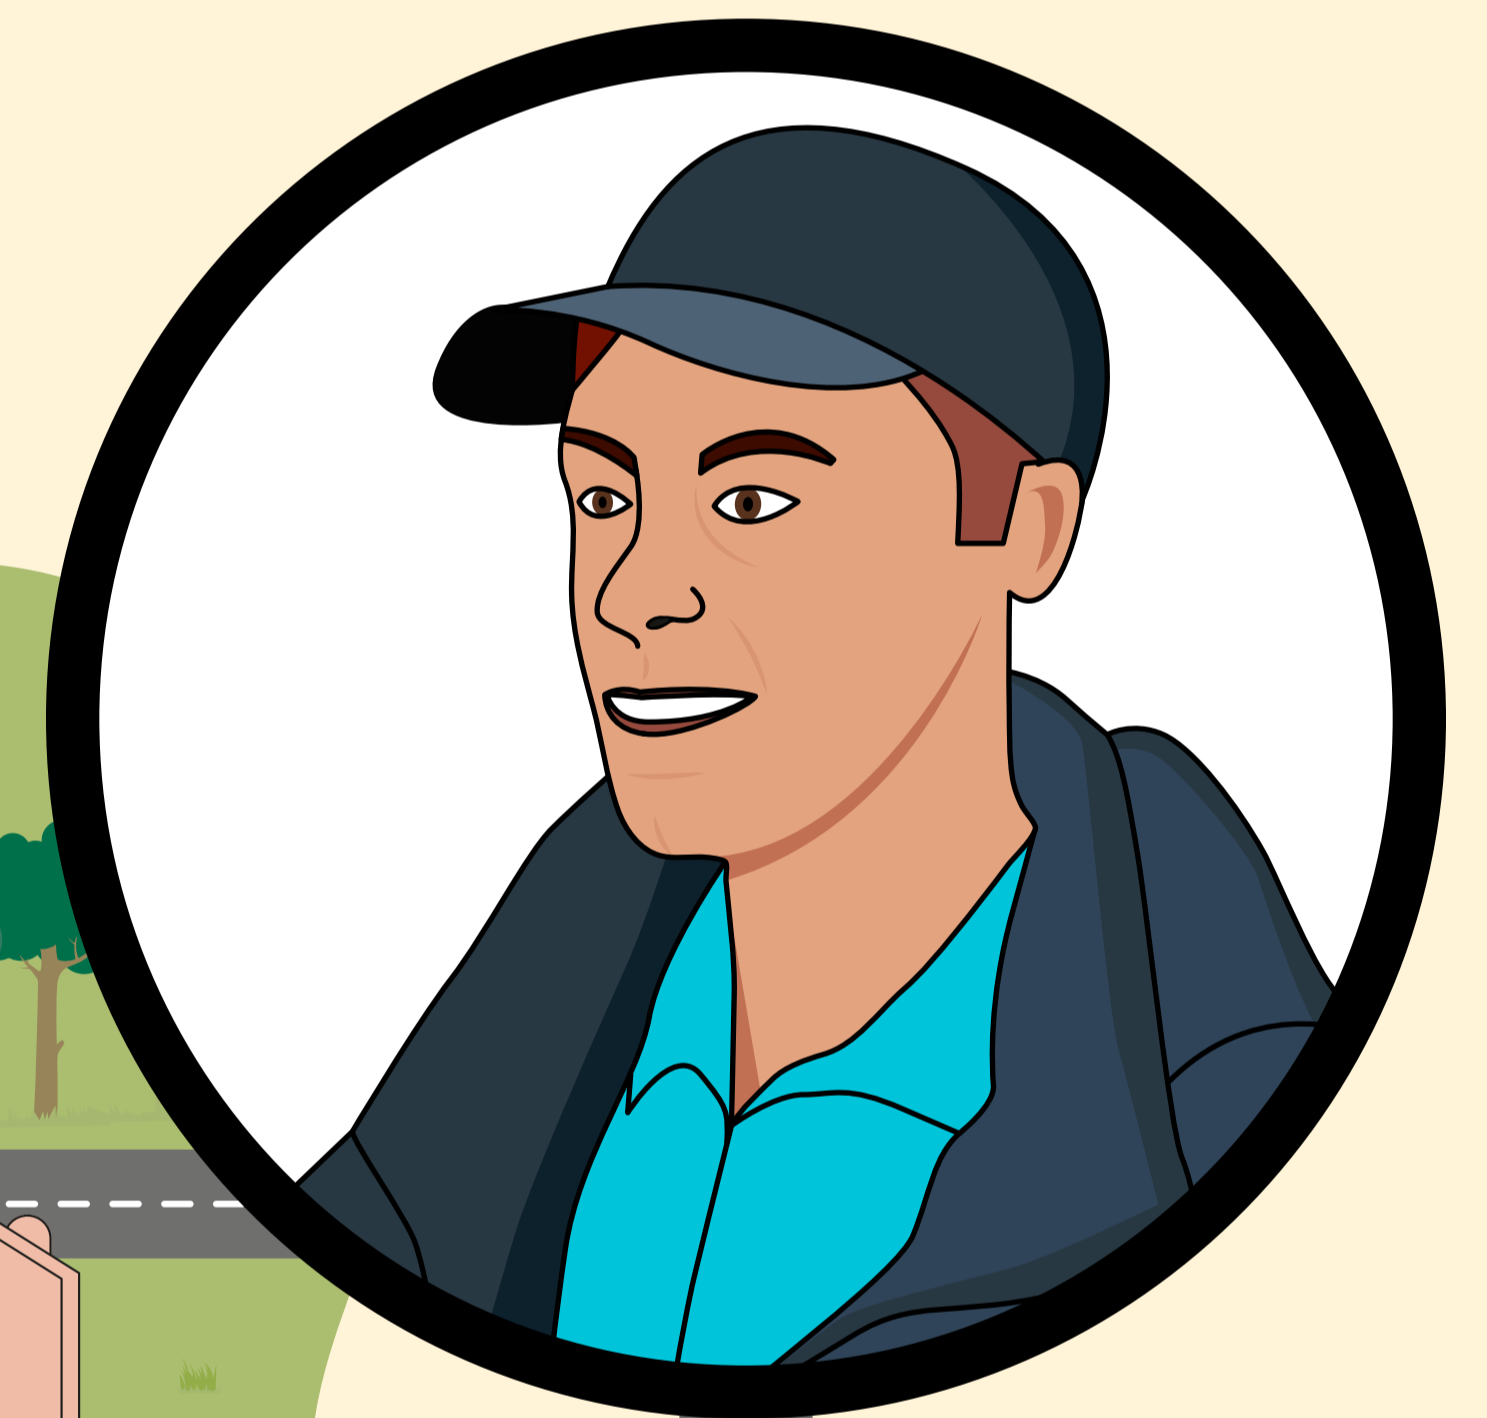

Their homes are being destroyed

They are being hunted too

They are disappearing from the forest

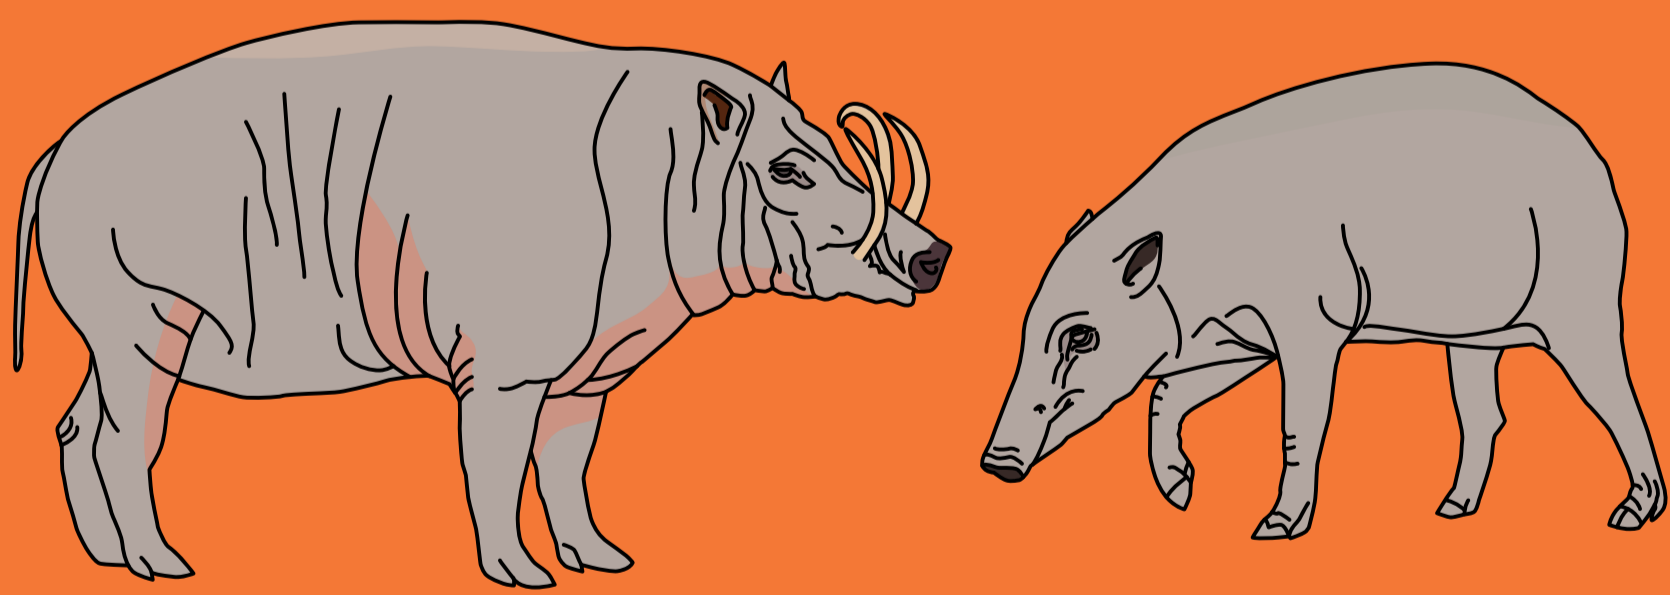

Zoos, governments and conservation organisations from all around the world are joining forces through a Global Species Management Plan

We're increasing their numbers by breeding babirusa in zoos

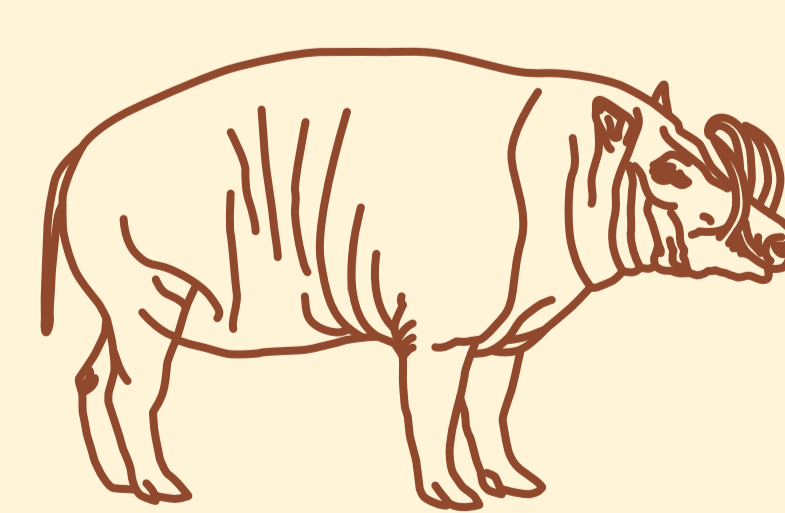

We are **RAISING AWARENESS** and **SUPPORT FOR BABIRUSA**

YOU can help to save babirusa!

TELL YOUR FRIENDS about babirusa

SUPPORT YOUR LOCAL ZOO to protect babirusa
